MEMORANDUM FOR: Mr. John Crowley
Deputy Director, Technology and Systems
National Security Council Staff

STAT

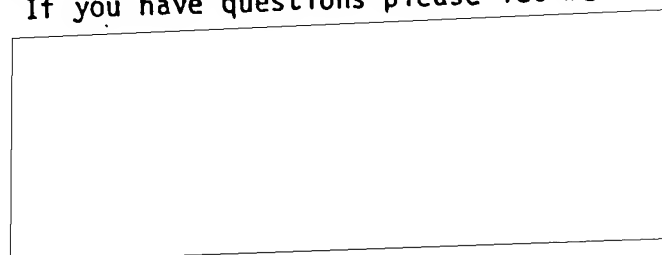

FROM:
Chairman, Intelligence Information
Handling Committee

SUBJECT: Intelligence Community Requirements
for Video Disc Maps

1. For your information and review, I am attaching herewith a preliminary draft of Intelligence Community requirements for video disc maps. The areas of coverage and map types specified are based upon review of the statement of requirements furnished by you to DMA by a working group of the WAOCC and our analysis of information provided to us by that group as to their requirements. Proposed fields of view and overlap are adapted from microfix standards where applicable. This is being proposed initially on the theory that, if utilized, it would make it easier for such projects to modify their software to accept discs being produced under this project and also to take advantage of work being performed for them.

2. This preliminary draft is being submitted to both the WAOCC Working Group and the IHC's Geographic Information Systems Subcommittee and Working Group for comment and coordination. Based on these comments we will then revise the proposal and formally submit it to both you and DMA. It is our hope that we could then work out with you and with DMA an agreed set of requirements which would meet both the White House and the Intelligence Community's requirements. Naturally, the final specification of levels and precise fields of view remains to be decided upon. I would appreciate very much having the benefit of your comments. If you have questions please let me know.
